## Method of Disposal Tracoe Products

As a manufacturer of medical devices, it is our responsibility as Tracoe Medical GmbH to provide clear guidelines for the safe and compliant disposal of our devices to ensure compliance with local regulations and to support effective environmental management.

Disposal of used products: (this information is also part of the respective instructions for use)

Used products are to be disposed of in accordance with national regulations, waste management plans, or clinical procedures governing biohazardous waste materials, e.g. the direct disposal in a tear and moisture-resistant and secure bag or container, which is routed to the local waste disposal system for contaminated medical products. For further recommendations, contact your hygiene officer in health facilities, or the local waste management for homecare use.

Disposal of packaging:

Tracoe Medical recommends that the packaging materials are recycled via local recycling collection systems or alternatively disposed of via municipal incineration, but local disposal regulations should always be followed. More information on how to sort the packaging can be found on our website via the following link: <https://www.atosmedical.com/environment/source-sort-tracoe>.

Best regards

Felix Dreher
